

## Details of Business

**Wires & Fabriks (S.A) Ltd**, is a leading manufacturer of Paper Machine Clothing in India.

Paper Machine Clothing, a Forming Fabric, is a high precision woven mesh with a unique weave structure made mainly out of polyester monofilament yarns having special properties. It is used in forming section (wet-end) of a paper machine and transforms pulp into a wet sheet of paper. This wet sheet is then transferred on to a Felt and then on to a Dryer Screen for making this wet sheet of paper into a dry sheet of usable paper. The product plays an important role in the final quality of Paper produced in the Paper Machine.

The Company manufactures a full range of Forming Fabrics (for the wet-end) and Woven Dryer Screens (for the dryer section) for almost all paper machines. Our products are exported to many countries around the world. We also manufacture woven fabrics for the pulp, technical textiles, ETP, etc.

Our manufacturing plant in Jaipur is equipped with the most modern machines & equipments. A highly qualified & experienced team of professionals work with customers to provide solutions for individual machines and paper making needs.
